To Whom It May Concern,

As the office manager of a busy business, being equipped with a reliable, easy quality phone system is an integral part in how I communicate with our clients and team overall. The frustration we experienced prior to the installation of the Fibernetics Phone System was a daily challenge. I was consistently apologizing to callers for poor call quality and dropped calls. It was a poor VOIP solution that only offered more issues and inconvenient features that made most call experiences frustrating.

Post installation, I can confidently state it is a joy to not have to constantly apologize to clients while experiencing clear call quality sound on every call. The features included with the system also provide great additional assets to our team and business overall without being billed for pay per use fees.

I would highly recommend Fibernetics Business Services, 5D Computers and Noline Tel as an excellent team of professionals. They have saved us money, seamlessly installed and trained us on an exceptional phone system that I am pleased to work with daily

Thank you, Fibernetics, 5D Computers and Noline Tel

Connie Ritchie
Office Manager
