Fibrenetics CLEC

**Attention: Philip Mahy**

**Reference: Testimonial**

Hi Philip,

Our new Fibrenetics PBX Phone System offers more features, better reliability, and lower cost than our previous provider, and at a zero startup cost. Financing the entire system through Fibrenetics was easy and even with the monthly equipment lease, our monthly bill is still lower than it used to be.

As a green building and green energy consulting firm, we appreciate working with innovative and creative partners. This is the perfect solution for a small and growing business, and the service is great to boot! Every business should take a good look at your PBX Phone System and all the free features it offers.

Thanks for being great to work with!

Best regards,
